

# Varied and elegant

The HSBC Colombo Fashion Week 2009 showcased a wide variety talent from South Asia. The keynote of the fashions displayed was guided by the thought of the behaviour of fabric against the body and how light and shade play an important role in fashion. Colours were in radiant hues, muted and earthy. The old world charm was also predominant in the creations from the designers from India and Pakistan. Sri Lankan designers drew their inspirations from early images of Ceylon and adapted them successfully modern styles.
